<p>Winter Fire Safety</p> <p><i>Jaime Garret - Roseville Fire Department.</i></p>	<p>Current issues keeping the FD busy: creek rescues, downed trees, wires down, carports blown off the driveway and much more rain related issues!</p> <p style="text-align: center;">HALF of home <u>heating</u> fires happen in December/January/February.</p> <p>Space heaters: <u>Never</u> use an extension cord or power strips! Plug into wall only. Use only one at a time and stay in the room with it. Keep a 3 ft radius away from furniture.</p> <p>Extension cord safety: Jaime pointed out to <u>never</u> use an extension cord or power strips with <u>anything that produces heat</u> = coffee pot, microwave, crock pot etc. etc.</p> <p>Pay for quality extension cord or power strips, not ones from discount stores.</p> <p>Chimney safety: have it inspected annually by a chimney sweep company, because leaves, animals can get in during the off season.</p> <p>Be careful with ashes! There are often small burning embers in the ash. Use an ash can that is metal with a lid to remove the ashes. Place the ash can in middle of yard until positive it completely cool. Do the same with charcoal grills in the warmer days. Do not leave close to the house.</p> <p>Smoke detectors: new ones last 10 years before you must replace entire unit. But still check that the alarm works once a month. You need one per floor, but ideally, one in each bedroom.</p> <p>Carbon monoxide detector: One is good for the entire house. It can be placed anywhere - high or low in the home.</p>	

<p>Winter Fire Safety, continued</p>	<p>Fire Extinguishers: Get several of the ABC types; at least one per floor + garage.</p> <p>Use of fire extinguisher:</p> <ol style="list-style-type: none"> 1. Call 911 2. Be sure of your exit route 3. Pull toggle 4. aim low! 5. squeeze handle 6. sweep back and forth. <p>Home electrical issues with outlets and etc: call a private electrician for electrical issues so they can test them.</p> <p>Power outages – unplug major equipment so that there is not a damaging power surge to appliances when power is restored.</p> <p style="text-align: center;">Keep fridge and freezer closed!!</p> <p style="text-align: center;">refrigerators keep the temp for 4 hours</p> <p style="text-align: center;">freezers will keep the temp for 48 hours</p> <p>Other fire department programs: Car seat program Smoke detector program</p>
